

7's 11's or Dubs

Game Name: 7's, 11's, or Dubs
Needed Tools: Dice & a Big Table
Drunk Level: Getting Started, Buzzed, Drunk, Hammered, Shit Faced

Get yourself some dice... a nice big table game is best played with 6 people but the most of 8... Get yourself a lot of beer whiskey or what ever you want to drink and a brandy glass and fill it all the way to the top.. place the loaded glass in the middle of the table Get your chairs around the table, start with the middle guy rolling the dice if he rolls a 7, 11, or doubles, he/she gets to choose who has to drink the glass of beer or what ever that is in it... When that happens you can't touch the glass nor the dice tell the glass has been touched, feel free to use any objects on the table to move the glass or dice closer to you... If your the Dice roller watch to see when that person touches the glass as soon as that happens they must drink up, but while there drinking you keep on rolling the dice tell you get another 7, 11, or doubles if you do this before the glass is put down then you refill it for them and they have to go again tell they chug faster and faster.. But if you do roll them again and dont see it thats your own fault... watch out for fakes on the glass touch because if you touch the dice before they touch the glass then you have to drink If your the Glass holder drink up as fast as you can before the dice catch up to you and you have to drink again, but always watch for him to fake grabbing the dice... but dont worry if you have to do it more than three times a bystander can steal the glass... Bystanders... After 3 glasses, feel free to steal the glass from the original drinker this will usually throw the roller off and gives everyone a chance to drink but if there hot on the rolling than your stuck with drinking tell someone steals it from you...
