

## Moose (Alternative Version)

This game is called "MOOSE", you need an empty ice cube tray, 1 quarter, and 2 empty shot glasses or cupz close to the same heighth. Set the tray down, "long way" facing all the players, then at the far end of tray, put the 2 glasses by side. Drunk Level - Buzzed, My friend taught me how to play the game.

The object of the game is to bounce the quarter into one of the slots of the tray or one of the 2 glasses at the end. Each player only gets to bounce the quarter once, then has to pass to the next player. If the quarter gets stuck on the tray and doesnt fall into the slot, that player gets another chance.

The number of drinks is determined by which slot the quarter lands in, \*example\* 1 being the closest and 7 the farthest. The left side of the tray is the give side, and the right side of the tray is the take side. \*\*\*say the player bounces the quarter into the 3rd slot on the left side, player gets to give out the drinks to one player or split them between players. Say the next player bounces it into the 2nd slot on the right side of the tray, they then have to take 2 drinks. If a player bounces the quarter into 1 of the glasses they then have to put there hands up to there head like a moose and wait for the other players to do so, but the last one to have the moose has to drink both the cups full of the preferred drink. But they can redeem them selves by making the moose head any time after there loss long as nobody else has made the quarter into the glasses. The last person to make the moose has to drink \*\*4 full glasses.
