

How Many (Shots)

Okay for this game you will need more than one type of liquor. At least three. Ex. Vodka, Gin, Rum.

One person chooses another to go against. They can choose anybody from the group (especially if they think they can beat them). Then they flip a coin to see who chooses the liquor. Ex. Jim: Heads. Sarah: Tails. (Its heads) Sarah: Choose your liquor. Jim: Gin.

And then after the liquor is chosen, the person who chose the liquor will ask How many shots of Gin can you take? Of course you will start at 1 and then you will go back and forth saying a higher number than the last.

If a person gets to a number you know you cant beat or you think that they can't take then you yell out DO IT! Then he or she MUST take the number of shots they just said otherwise they will have to either take a shot of something disgusting (toilet water) OR do something really stupid (run down the hall naked). Now if they DO take the number of shots they said then YOU will have to take the shot of toilet water or run down the hall naked.

This game will SURELY get the party started!!!

I kinda took this game from the Gauntlet haha. Cept they do it with lifting logs in a cage.

Drunk Level: Getting started. OR you can do this at any point.
